The Art of Finishing: How A.B. Enterprises Turns Metal Into Masterpieces

At **A.B. Enterprises**, every piece of hardware tells a story — not just of metal and finish, but of heritage, craftsmanship, and design evolution.

For over two decades, our team in **Aligarh, India** has been creating premium **cast iron, brass, and ceramic hardware** for homes around the world. From **door handles** to **hooks, knobs, and brackets**, every product we make undergoes a careful finishing process that defines its beauty and longevity.

Antique Finish — A Touch of Timelessness

The antique finish is all about character. It adds a sense of age and history — perfect for vintage interiors and rustic homes.
Each piece is hand-finished to achieve a naturally aged texture that feels authentic and elegant.

Powder Coated Finish — Strength with Style

Powder coating gives our products a sleek, uniform look while enhancing durability. It resists corrosion, scratches, and fading — making it ideal for modern homes and outdoor installations. Our matte black and bronze tones are among our most loved finishes.

Rustic Finish — Raw, Real, and Artistic

The rustic look embraces imperfection — celebrating natural textures and handcrafted details. No two pieces are ever the same, and that's the beauty of it. Each tells its own story through subtle variations in color and tone.

Craftsmanship that Travels Worldwide

From design sketches to finishing touches, every A.B. Enterprises product reflects a legacy of **Indian craftsmanship** blended with modern innovation.
We proudly export our products across **Europe, the USA, and the Middle East**, offering timeless décor solutions to global customers.

Our philosophy is simple — **create hardware that lasts, inspires, and connects homes across cultures.**
